FORT-ABLE HOMES

Our goal at Fort-Able Homes is to make sure you get the most out of your extra space. Whether you want to add a unit to your space to generate some extra income, or you want to have a distraction free area for yourself, or add an extra bedroom to your house; whatever it is, we are here to help you with it.

With our prefab homes, you can enjoy the benefits of a spacious, comfortable, and well-designed home, all while making the most out of your extra space.

We manufacture your house off-site, transport it to the home site, & then assemble it on-site.

OUR PHILOSOPHY

At Fort-Able Homes, we believe in creating homes that are both modern and stylish. We aim to manufacture homes that are not only cheaper and faster to build but also produce less waste. Fort-Able homes are made of superior materials, at an affordable price, and are modern, sustainable, and of high quality.

From design to delivery, we strive for excellence in everything we do, resulting in homes and garden suites that are not only beautiful, but also built to last.
